

WASTE AUDIT GOT 2019

Steps:

Intro: Environmental Health and Safety expert on site training

1- Open all bags on the tarp and sort the trash by the following categories> See below

2- Put each sorted category in bags again

3- Have 1 volunteer weigh the bags from each category

6-Report each weighing session by category in the form below

7- Once all the bags are weighted, put them back in front loader

8- use the data from weach category and associated weighing session to get final weigh per category

9- From the aggregate of all category weighs, deduce the % of total for each category

Report weigh in Lbs	Session # 1	Session # 2	Session # 3	Session # 4	Total	%
Cardboard	2.38
